DESCRIPTION OF THE GUARANTOR

BOOYSENDAL PLATINUM PROPRIETARY LIMITED

1. DESCRIPTION OF BUSINESS

The operations of Booysendal Platinum Proprietary Limited (**Booysendal**) are located in the southern compartment of the eastern limb of the Bushveld Complex, situated approximately 35km from the town of Mashishing (formerly Lydenburg), straddling the border of Limpopo and Mpumalanga provinces in South Africa. The massive Booysendal orebody is host to both the UG2 and Merensky reefs which outcrop over a strike length of 14.5km and dip westwards at approximately 10°.

The Booysendal North UG2 mine is a shallow, mechanised room and pillar underground operation. The North shaft complex comprises four declines, three on reef and one in the reef footwall, which are accessed by a reverse decline system.

Surface metallurgical infrastructure includes a UG2 concentrator and a dense media separation plant. Concentrate is sold to Zondereinde and all material is smelted and further processed at Zondereinde.

At the North mine a shallow mechanised bord and pillar operation has also been developed on the Merensky reef horizon. This comprises two on-reef access declines.

The balance of the Booysendal resource will be accessed through a number of decline systems being developed as part of the Booysendal South project. These declines will target both the UG2 and Merensky reefs. Ore will be transported from a central point across the valley to the large capacity concentrator at the old Everest mine by a unique aerial rope conveying system. Other smaller projects to unlock value from the resources at the old Everest mine are being undertaken.

2. BOARD OF DIRECTORS

The members of the board of directors as at the Programme Date are:
